

# PMX-III – Calibration Order Form

March 2009 – April 2010

## Instructions

Start to fill out the Customer Information above. On page 2 the instrument calibration is specified. If any accessory is missing in the order form, please use the separate order form “Detectors – Calibration Order Form”, and attach that form with your order.

Please be careful when filling out the form so that no parts that are intended to be calibrated are missing. Only calibrations that are marked in the order form will be performed.

Type of calibration has to be specified. The types of calibrations are specified below.

### Adjustment/Calibration

The unit is adjusted to meet the manufactures specifications and compared to a traceable reference. The deviation is recorded and a calibration record is made. Prices in the price-list are valid for this choice.

### Check/Adjustment /Calibration

The unit is measured and the deviation from the reference is checked before any adjustment is performed. Adjustment is done and a calibration is performed. The deviation from the reference is recorded and a calibration record is made. Prices in the price-list are multiplied with 1.25 if this choice is ordered.

Please complete one form for each instrument and corresponding accessories. Return the form with the instrument. Send also the form by fax when the unit is shipped to speed up turn-around time. All items on one order form must be shipped to RTI at the same time.

## IMPORTANT!!

**No work will be done on a unit before the forms are filled out correctly and sent to RTI.**

# PMX-III – Calibration Order Form

March 2009 – April 2010

PMX-III S/N:

<b>Distributor:</b>	
<b>Name:</b>	
<b>Date:</b>	
<b>Return address and phone number:</b>	
<b>Your order no:</b>	
<b>Notes:</b>	

9603262 PMX-III, kV and electrometer\* € 600

\*) Calibration of the preamplifier AMP-1 is included if present

9613301 R100, start cost S/N:  € 81

- 9603270 BQ A, (Rad, W/23 mm Al) € 81
